

Citadon CW Windows Client 8.0.6: New Features and Enhancements.

This is to be considered a PATCH release and contains the following enhancements and fixes:

Changes

- Correct sorting on Upload Date column on the Previous Version pop-up list for a document. Also, initial view of the previous version list is now shown in descending upload date order.
- Correct sorting on Upload Date column on the History tab for both Document Properties and Folder Properties.
- Correct pagination for printing of business process forms with multi-line rich text boxes.
- Correct behavior when multiple items are removed in the Modify Binder pop up.
- Modified approach for downloading multiple files with long file names to overcome issues encountered when a user is downloading to a machine with Microsoft XP.
- Limit Business Process Title to 255 characters. Note: any existing title that is longer than 255 characters has been modified per the customers direction.
- Ensure that if the Secure Session flag is set on the Login Options, a secure session is used when the user accesses the system through a CXO file.
