

SWORD

UPGRADE YOUR BUSINESS

Corporate Background

SwordCTSpace, a global leader in Engineering and Construction Content Management

Sword Group

Sword Group is a leading global provider of high-value business improvement solutions with 1800 worldwide employees and \$250 million in revenue. In Software Magazine's Software 500, a list of the world's largest software and service providers, Sword Group was ranked 127th. It was also ranked the 13th largest software company in Europe. The group was also highlighted in the report as a top performer with 23 percent year-on-year growth.

About SwordCTSpace

Part of the Sword Group, **SwordCTSpace** provides document management & collaboration workflow applications to the construction and engineering industry that increase the efficiency and reduce the risks in managing a built asset throughout its entire lifecycle.

Our solutions, available worldwide, 24/7, are used by organizations involved in project management, engineering design, construction management, and asset operations. By utilizing our solutions, architects, engineers and contractors are more effectively managing programs and projects, with clear and tangible benefits to their operations such as:

- Improved project communication
- Full transparency across the project
- Enhanced ability to manage schedules and risks
- Improved regulatory compliance

SwordCTSpace Solutions

SwordCTSpace is unique in offering both online software as a service (SaaS) solutions and on premises enterprise solutions, the latter of which leverage an organisation's existing investment in leading ECM platforms.

FusionLive - Project Content Management

SaaS based Project Collaboration solution, specifically designed for the construction & engineering industries. Available to all project participants across the supply chain.

FusionEnterprise - Engineering Content Management

On premise Document Management & Enterprise Content Collaboration solutions that leverages the world's leading DMS systems to manage the Engineering & Construction Content of an Enterprise:

- Fusion**Enterprise** for IBM® FileNet P8®
- Fusion**Enterprise** for Microsoft® Sharepoint®
- Fusion**Enterprise** for Cimage
- CADTop, an optional product for Fusion**Enterprise** that provides a seamless integration of AutoCAD/Microstation with the ECM system of choice

When deployed in tandem, our solutions provide an integrated environment based on best practice templates that support a project through its entire lifecycle: from design (content in process), through construction (active content) and into operation and maintenance (historical content).

SwordCTSpace's Services

Our team offers a full range of consulting services around the design, implementation, and support of your engineering content management solution, whether SaaS or on premise. We are engineering and project content management experts, here to assist you with rapid deployments and in-depth integrations.

Solutions Design to meet clients requirements

Our system architects are well versed in integrating the Fusion product suite into an organization's existing infrastructure. Our functional consultants offer years of hands on experience in the areas of program, project, and document management. These exceptional professionals will assist you in developing a solution that is "right sized" to meet your business needs and systems requirements. Our team will evaluate your current environment against best practices and the SwordCTSpace applications suite to offer the optimal solution for your organization. SwordCTSpace Services is prepared to architect a solution that ensures customer success and superior ROI.

Proven Implementation Methodology

From two days to six months, "in the cloud" or "behind the firewall", we can set up systems in a matter of hours using our predefined templates and we can also spend long periods customizing systems to meet clients every need. Our project managers and implementation specialists use our proven implementation methodology to ensure the successful, timely, and cost effective deployment of your engineering content management solution. Our team will lead your organization through the entire implementation lifecycle: detailed design, planning, custom development and integration, test, production release, and end user adoption.

Worldwide Support

SwordCTSpace Support is worldwide and world class. Online, by phone, or at your facility, we take great pride in standing by our solutions and our customers.
